									Median	23.2	48.5
									Mean	80.6	104.4

**Notes:**

- Clamy (Chlamydia), Gono (Gonorrhea), Sypl (Early Syphilis), Total (sum of all three types of included infections)
- Count of cases includes a two-year period of time.
- Infection rates are based on zip code of residence, not location of the medical service.
- Infection rates are presented as an annualized estimate for each two-year period. They are not age-adjusted.
- Three zip codes are too small ( $\leq 4,000$  residents) to report infection rates.
- The hatched square indicates a 'high need zip code' as identified in *Building a Healthier St. Louis*.
